

Seamless facial and palm identification for your NEDAP system

Why choose Innovatrics as your biometric provider?

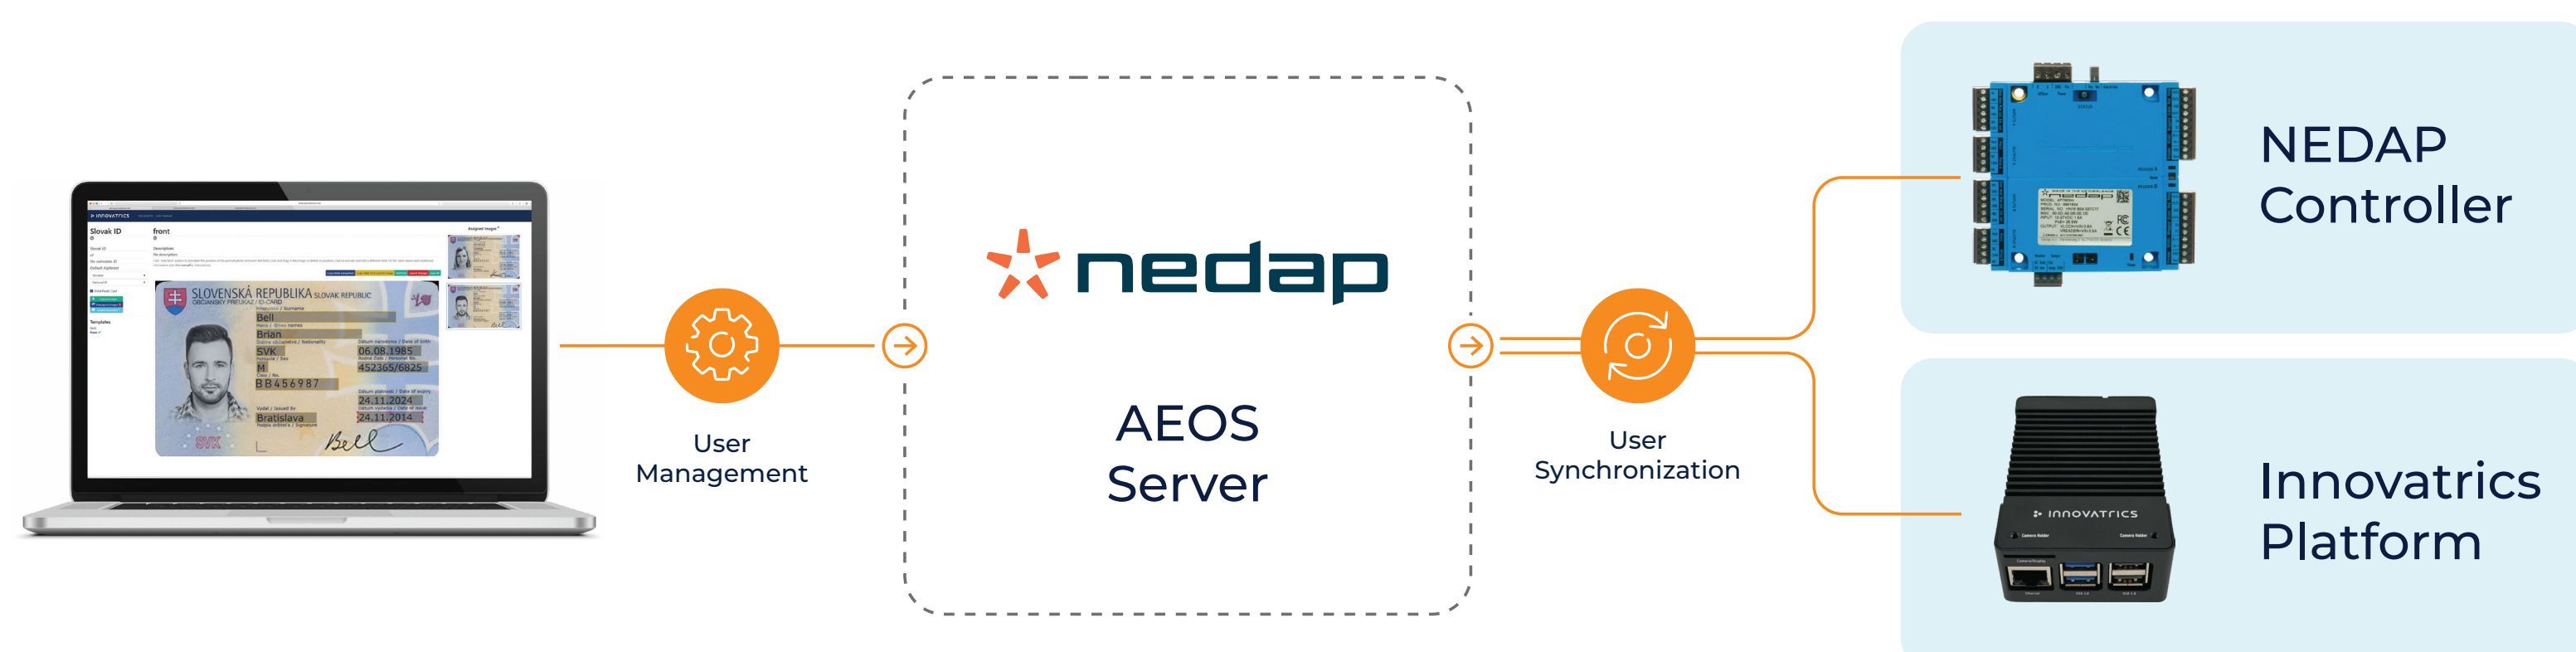

- **Fast & Accurate Identification**
for better user experience
- **Smart Camera Support**
ensures biometric processing occurs only on the edge
- **GDPR Compliant**
gain full control over the data
- **Multifactor Verification**
for added security
- **Spoof Prevention with Liveness Detection**
protects against fraudulent attempts
- **Auto-Learn Function**
for consistent accuracy and to minimize the impact of aging

Innovatrics and NEDAP Integration Schema

Automatic Persons Synchronization

from NEDAP AEOS to Innovatrics Platform

Components:

- Smart Camera
- NEDAP Controller for Access Control or Locker Management System
- Raspberry Pi 5 8 GB
- Standard Network Infrastructure

Easy to deploy solution:

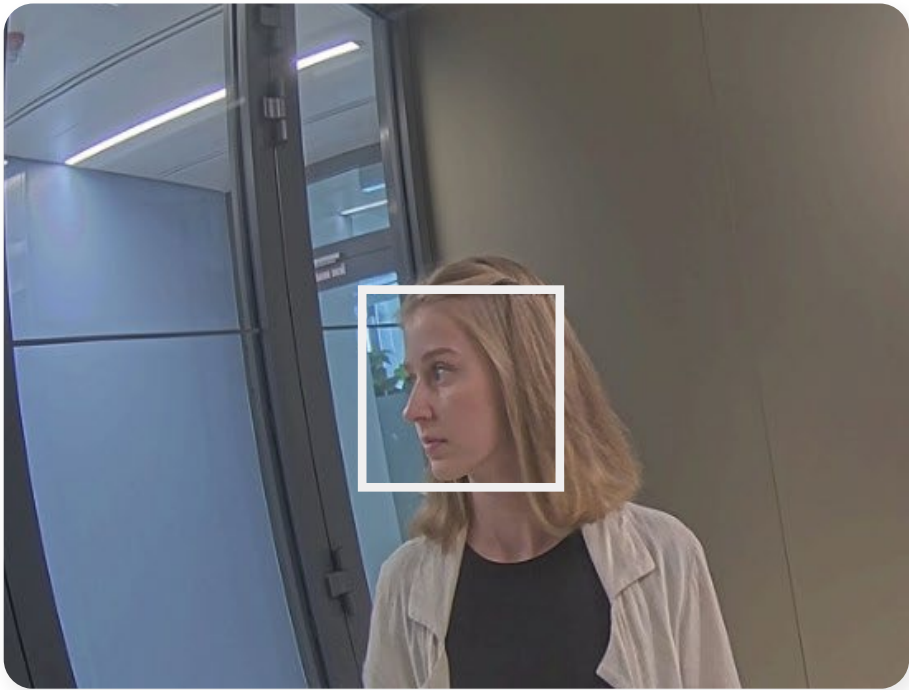

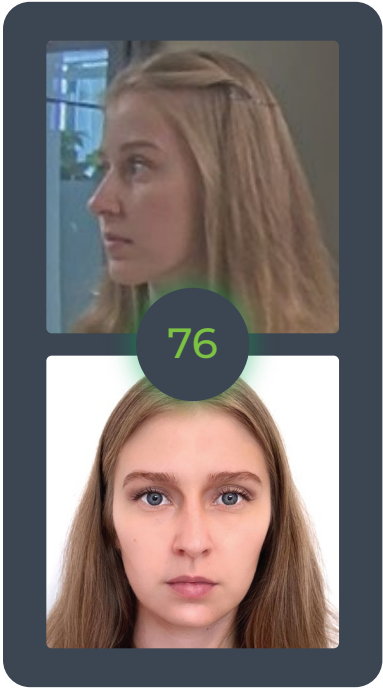

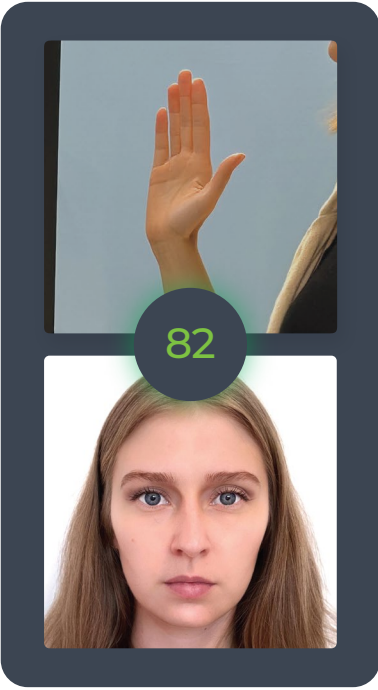

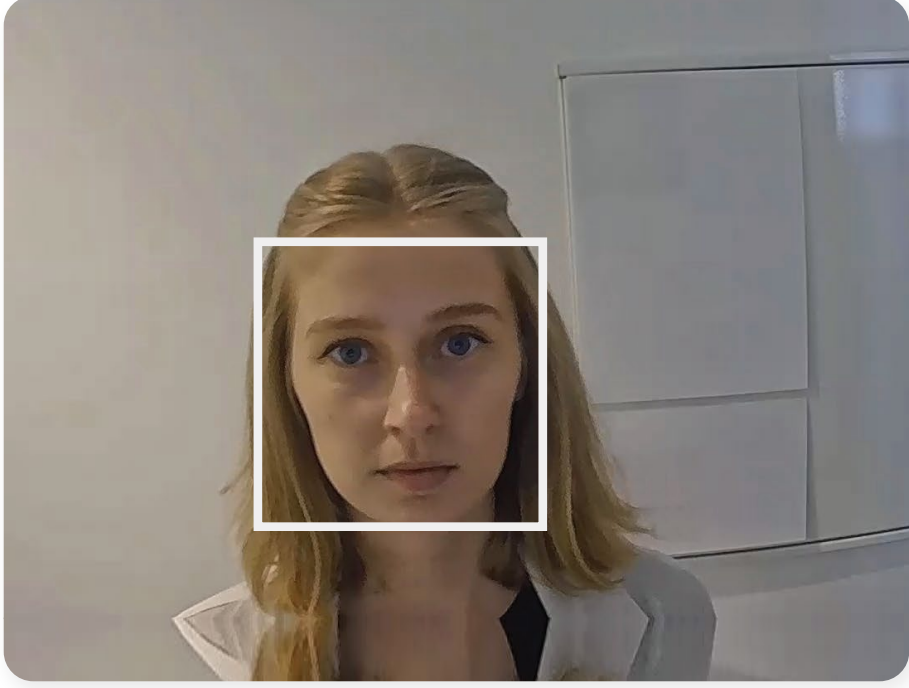

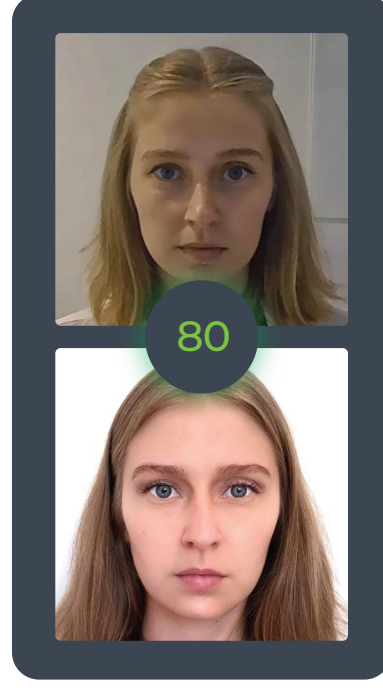

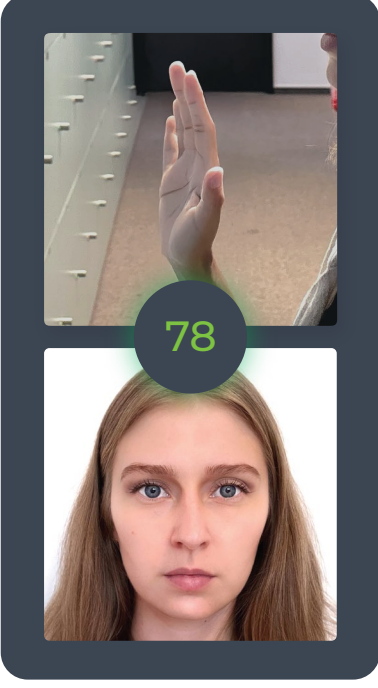

- Use up to 30 cameras on Raspberry Pi
- Automatic synchronization of persons entered in AEOS
- Use existing network infrastructure
- Use smart camera to open smart lockers
- Scalable to any project size

List of supported cameras and camera vendors:

- **AXIS** (M4216-LV, M1055-L, M2035-LE)
- **Hanwha** (PND-A9081RV, PND-A6081RV, PNV-A6081R, PND-A6081RF)
- **Lilin** (Z7R8182X2-PAI)
- **Dynacolor** (U2-6, U2-B)

or any other camera with CV Ambarella SoC

Real world deployments:

	Identification Area	Camera View	Face Match	Palm Match
 Door Control Application				
 Lockers Control Application				
 Speed gate Control Application
